#### Description

The idea of [connections](#) is quite clear. Sorting 16 completely unsorted words into four groups of four is your task while playing the game. Words may be combined because they all refer to the same term or object, such as "car parts," or because they share another characteristic, such as "ends with x." The categories are almost limitless, and the clever people at Connections go above and above to ensure that organizing items into categories is challenging. There is a lot of room for interpretation, which is why it takes four incorrect answers to lose the game.
