Description			
<p>the baby in yellow is a terrifying video game that can make you think twice about getting a babysitter. You, as the player, assume the role of a babysitter responsible for caring for a peculiar youngster in the eerie computer game The Baby in Yellow. There are five distinct chapters in the game, and each one takes place on a different night. Follow the on-screen instructions precisely when it comes to feeding, changing diapers, and putting the baby to bed, as these are the most fundamental aspects of babysitting. Because of the baby's disturbing personality traits and demonic abilities, it's more complicated than it seems. Within the house, he possesses the ability to walk, lift objects, and transform into a terrifying creature.</p> <p>Sound effects and realistic 3D images heighten the game's foreboding mood. Terrifying jump scares and unexpected twists abound in Garten of Banban. The game's short length belies its repeat value thanks to the backdrop's hidden objects, puzzles, and unlocked modes. Experiment with some common household things to see your baby's reaction.</p>
