username hint when adding new user

12.12.2017 15:06 - Miroslav Blaško

Status:	Closed	Start date:	12.12.2017
Priority:	Low	Due date:	
Assignee:	Tomáš Klíma	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:		Spent time:	0.00 hour
Description			
When creating new user, a username should be pre-filled with probable value of new username.			
More specifically, it should be possible to create users based on pattern such as doctor\$NUM, admin\$NUM.			
Concrete patterns of usernames can be extracted from:			
- history of created users (e.g. In case where doctor2 was last created user, we can look for MAX=maximal number, where username doctor\$NUM exists. Then for new username we can assign doctor\${MAX+1})			
- a role that is selected within "create-user form" (thus look for last username of same role as the selected one)			

History

#1 - 26.03.2018 21:22 - Tomáš Klíma

- % Done changed from 0 to 100
- Status changed from New to Resolved

#2 - 26.03.2018 21:22 - Tomáš Klíma

- Assignee set to Tomáš Klíma

#3 - 27.03.2018 12:38 - Miroslav Blaško

- create generateUsername rest service

#4 - 27.03.2018 12:40 - Miroslav Blaško

- Status changed from Resolved to Rejected
- use generateUsername service instead of client side handling

#5 - 27.03.2018 12:41 - Miroslav Blaško

- Status changed from Rejected to New

#6 - 27.03.2018 19:56 - Tomáš Klíma

- Status changed from New to Resolved

#7 - 18.04.2018 14:12 - Miroslav Blaško

- Status changed from Resolved to Closed
