<b>Description</b>			
Main menu of the application contains links such as: "Study Manager" "Users" "Institutions" "Patient records" ...			
All links works fine except of link "Study Manager". "Study Manager" links does not work correctly when web application context is different from "/": <a href="http://localhost:8081/study-manager/">http://localhost:8081/study-manager/</a>			
The problem is that it navigates to: <a href="http://localhost:8081/#/dashboard">http://localhost:8081/#/dashboard</a> instead of <a href="http://localhost:8081/study-manager/#/dashboard">http://localhost:8081/study-manager/#/dashboard</a>
